Description & Uses

GranoSorrento is a high build acrylic texture coating that is applied by lambswool mitt to create a bagged Mediterranean style texture. GranoSorrento may be patterned using a block brush whilst still wet to give a more subtle finish. GranoSorrento may be left matt or overcoated for enhanced durability with GranoShield Matt, GranoImpact or GranoSkin Membrane.

Features & Benefits

- Creates a bagged Mediterranean style texture
- May be patterned using a block brush for a more subtle finish
- Resists extremes of weather and atmospheric attack
- High resistance to all forms of mould, fungi and bacteria

Colours & Gloss

Bases may be tinted as required. Tint using Ecotint® to Wattyl Colour Designer® range of colours or other competitor colours.

Matt.
Matt when overcoated with GranoShield Matt (G2.27).
Low Sheen when overcoated with GranoImpact (G2.01).
Satin when overcoated with GranoSkin Membrane (G2.14).

For exterior application, it is recommended that the light-fastness of the chosen colour be confirmed before ordering.

Properties & Performance Guide

Dry & Recoat Times	Surface Dry - 4 hours
	Recoat - 24 hours
	Hard Dry - 7 days
	Figures are quoted at 25°C and at 50% humidity. Drying will take longer at lower temperatures or higher relative humidity.
Density	1.85 Kg/L.
Consistency	Thick and creamy liquid.
Texture	Bagged or brushed.
Coverage per Coat	1.9 Kg/M ² (0.95 M ² /L).
Wet Film Thickness	1020 microns (approx).
Dry Film Thickness	620 microns (approx).

Properties & Performance Guide...Continued

Moisture Control	Excellent, however, the coating should not be subject to hydrostatic pressure.
Abrasion Resistance	Excellent.
Tensile Strength	Excellent.
Impact Resistance	Excellent.
Thinning	Not required but if desired thin sparingly with water.
Clean Up	Clean up with cold water away from drains. Protect Our Environment: Do not pour leftover paint down the drain. Unwanted paint should be kept in a sealed container, and then disposed of via special waste collection services. Empty paint containers should be left open in a well ventilated area to dry out. Disposal of empty paint containers may differ between local authorities. Check with your local council first.
VOC (Volatile Organic Compounds)	VOC < 65g/L.

Recommended Substrate Conditions & Preparation

Surfaces are to be suitably prepared in accordance with proper trade practices.

GranoSorrento may be applied to off-form concrete Class 2 (AS 1510) or equivalent, cement rendered fair-faced flush-jointed concrete block and brickwork (common, clay, concrete, Calsil®, and extruded), ExoTec®, CFC, fibre cement sheeting, tilt-up and pre-cast concrete, Autoclaved Aerated Concrete (AAC), paper-faced plasterboard. Make-good of the substrate is necessary if substrate imperfections are to be eliminated. Please refer to Technical Data Sheets for GranoRender Sponge Fine Finish (G1.17), GranoRender Coarse (G1.18), GranoRender PM Medium (G1.25), GranoPatch Smooth (G1.04), GranoPatch Spackle (G1.05), GranoReady Render (G1.12) or GranoSponge Fine Acrylic (G1.21).

Surface preparation is the responsibility of the Builder, Renovator or Main Contractor and the Applicator. To achieve the indicated performance, application must be carried out according to Wattyl's recommendations.

Ensure the surface is clean and dry. All substrates must be free of dirt, dust, grease, oil, mould release agents, bondbreakers and any other contaminants that may interfere with adhesion.

Fresh cementitious substrates should be left for 14-28 days before coating. There must be less than 15% moisture content in the surface at the time of coating to ensure optimum coating performance.

The substrate must not be subjected to continual wetting, ponding water or hydrostatic pressure.

For specific substrate preparation, see relevant specification sheets.

Application Guide

Stir contents thoroughly with a power stirrer before use.

Bagged style: Apply 1 coat to a correctly prepared and primed surface by lambswool mitt.

Brush style: Apply 1 coat to a correctly prepared and primed surface by lambswool mitt then block brush whilst still wet. GranoSorrento may be overcoated with GranoShield Matt (G2.27), GranoImpact (G2.01), or GranoSkin Membrane (G2.14) for enhanced durability.

If GranoSorrento is used as the final coat in a 'matt' system, consistency of colour between different drums and/or batches cannot be guaranteed. Topcoating with GranoShield Matt, GranoImpact or GranoSkin Membrane is recommended for consistency of colour, system longevity and ease of maintenance.

Freshly applied material must be protected from frosts and rain for a minimum of forty-eight (48) hours.

Application **should not** be carried out if the air temperature or the substrate temperature is below 10°C or above 35°C or when humidity is very high. The temperature must not fall below 10°C during the drying process.

In exterior application avoid painting when dew or rain is likely.

Additional Data

Available in 15 litre (27.7 Kg) containers.
Not suitable for horizontal roofs, ponds etc., or walk-on surfaces.
Tinted paint is non-refundable, so choose your colours carefully.
If using more than one container for the final coat, check that the colour is correct in all containers and mix the paint together to ensure colour consistency before starting.
Leave 7 days after application of final coat before washing. Wash using a sponge or soft cloth with warm water and mild detergent. Avoid harsh scrubbing and strong household cleaners.
Containers must be secured and stored upright during transit.
Containers must not be exposed to excessive heat or cold.
Storage must be under cover, away from direct heat, freezing and moisture, in well-sealed containers.
It is recommended that application be carried out by a skilled applicator, who is totally conversant with the Granosite products and systems, to validate full material warranty conditions.
The use of proprietary additives other than those manufactured by Wattyl is not recommended.
Do not use for any other purpose other than as specified in our literature.

Safety Data

First Aid Instructions	For advice, contact the Poisons Information Centre on 131 126 (Australia), 0800 764 766 (New Zealand), or a doctor. If swallowed, do not induce vomiting. Give a glass of water to drink. If in eyes, wash out immediately with water. If inhaled remove from contaminated area to fresh air. If skin contact occurs, remove contaminated clothing and flush contaminated skin with water.
Safety Directions	Keep out of reach of children. Avoid contact with skin and eyes. Ensure adequate ventilation during use. Avoid prolonged breathing of vapour. Wash hands thoroughly after use.
Further Information	For the latest information refer to the Safety Data Sheet available on our websites. Australia: www.wattyl.com.au or contact Wattyl Assist on 132 101. New Zealand: www.wattyl.co.nz or contact Wattyl Assist on 0800 825 7727.
